LANGUAGES

Tamil, English

[NuVuW](#) — *iOS, Swift*

NuVuw.com is for property builds or renovation projects connecting homeowners with Architects, Interior designers and construction professionals at every stage of the project. Homeowners save comprehensive tools to capture ideas, create 3D models and collaborate with architects and interior designers to refine designs before selecting construction professionals. Your dashboard gives you a summary view of critical activities, and financial controls to track progress. Professionals Are visible to thousands of clients, receive quote/tender requests direct to your dashboard, manage projects in one place; designed for single/multi-site projects including team and sub-contractor management.

[QuickPay](#) — *iOS, Swift/Android, Java*

QuickPay is the lightest mobile Stellar Lumen wallet, for everyday transactions. It works like any money wallet service and needs a master Lumen account in either Bittrex, Binance, Stronghold, etc.

[AppLO](#) — *Xamarin.Forms/C#, XAML*

AppLO This application is a platform for indexing, managing and distributing LO (Learning Object) content. It provides access to a cloud-based knowledge library with a variety of documentation, training content and resources for the client, depending on their ecosystem. With this application, it is possible to manage content, have real-time monitoring, and view offline content by downloading them beforehand.

[JSS - Poison Information Centre](#) — *Android, Phonegap*

Poison Information at JSS Hospital, Mysore with the objective to improve the health of the public by minimizing or preventing illness and death due to poisoning. The Poison information services will be provided free of cost to healthcare professionals and the public.

[SRMVCAS - Student](#) — *iOS, Swift/Android, Java*

This project is about the Student information application. It says about the student profile information, attendance and mark details. To identify student performance in an examination and student attendance report.

[Daily Instant News](#) — *iOS, Swift*

Daily Instant News provides news in English, French, etc. and also containing other counters from leading newspapers of Country. Get breaking news, daily news headlines & updates on politics, sports, business, health & entertainment, technology. Stay updated with trending news.

[Linq Tutorial](#) — *iOS, Swift*

Language-Integrated Query (LINQ), which is descriptive for where it's used and what it does. The Language Integrated part means that LINQ is part of programming language syntax. In particular, both C# and VB are languages that ship with .NET and have LINQ capabilities.
